Dear Parent or Guardian:

Rubella (German Measles) is a mild disease, usually affecting children. However, when a pregnant woman has rubella she may lose the child or the newborn child may have serious handicaps. To avoid this happening unnecessarily rubella vaccine is available and it is proposed to immunize all children between one year and the twelfth birthday.

Rubella vaccine for protection against German Measles (3-day measles) is not the rubeola vaccine for "red measles" (7-day measles).

Rubella is impossible to distinguish from other illnesses with rashes without laboratory tests. It is therefore considered important that your child be immunized regardless of whether you believe he has had rubella. Vaccination will do no harm even if the child has already had the disease.

Vaccinated children are not infectious to other persons. Most children will experience no reactions to the vaccination. This vaccine has been shown to be effective in trials with millions of children.

Special rubella vaccine clinics for children under 12 years of age are being scheduled in all schools beginning September 14th. (Children whose twelfth birthday occurs in September 1970 will be eligible to receive the rubella vaccine at these clinics).

If you wish your child to be immunized for rubella, and if your child has not had the vaccine for Rubella, please sign the consent form and have your child return it to the school not later than Friday, September 11, 1970.

DETACH AND RETURN THIS CONSENT FORM
Consent for Rubella Vaccine

Name _____ School _____

Address _____ Div. _____ Grade _____

I request that my child _____
be immunized with rubella vaccine.

Date _____

Signature of Parent _____
