

6. Re: 3800 and 3900 Blocks Hastings Street
Hastings Street Redevelopment Project No. 1

Alderman Dailly asked at the December 6, 1971, meeting that we examine the condition of the above property.

The Land Agent advises that he has examined the subject property and made a record of all vehicles parked thereon. The owners of these vehicles have been contacted and have been informed verbally that they must be removed as soon as possible.

The owners of the pallets and other material dumped on the lots have also been contacted and they advise that as soon as snow conditions permit these materials will be removed.

A further examination will be made during the coming week to determine whether the arrangement as set forth has been complied with. In the event this is not done, authority will be given to have all vehicles parked on this property towed away and impounded, and to remove the pallets and any other material for such disposal as may be feasible.
