

ITEM 3

MANAGER'S REPORT NO. 63

COUNCIL MEETING Oct. 4/71

3. Re: Fire Hall No. 6.

Alderman W. Clark has, in discussion with the Manager, suggested that the same Committee of Council that was struck for the No. 1 Hall should be authorized to work with staff on behalf of Council during this project.

The establishment of a Council Committee for this project had been considered by the Manager but it was felt that the project was relatively small for such an approach. Notwithstanding that point of view, the Manager is certainly prepared to work with a Committee if this is the wish of members of Council. One preliminary meeting has been held by the Chief Building Inspector and the Fire Chief with the Architect, and we are in the process of making a contour plan of the area so that the Architect can start his planning.

The members of the Committee for the No. 1 Hall were Alderman W.R. Clark (Fire Department Liaison Alderman) as Chairman, and two Aldermen - J. Dailly and A.H. Emmott.

May we have Council's direction in this connection?
