

THE CORPORATION OF THE DISTRICT OF BURNABY

INTER-OFFICE COMMUNICATION

Municipal Manager . DEPARTMENT: DATE: 5 Feb./71
FROM: Municipal Engineer DEPARTMENT: OUR FILE #
SUBJECT: Engineering Services Proposals -- YOUR FILE #
Ornamental Street Lighting Design

In order to be able to proceed with calling contracts for street lighting at the most opportune time without causing undue conflict with other works coming up in 1971, we require consulting engineering services for ornamental street lighting design in three specific areas of the Municipality, namely, Garden Village, Sullivan Heights, and Imperial/Walker.

Accordingly, engineering proposals were invited from three Engineering Companies for the provision of the required services. The tabulation of the proposals with quotations is attached hereto.

The lowest and most attractive proposal was received for each of the three street lighting areas from El-Sewaro Engineering Company, totalling for the three areas, \$9,550.

More specifically, the services called for embrace design, drawings, and "as constructed" drawings for ornamental street lighting in the afore-mentioned areas.

It is recommended that authority be granted to enter into an engineering agreement with El-Sewaro Engineering Company for the provision of the engineering services as detailed above for the particular areas of work called for.
