

ITEM 3

MANAGER'S REPORT NO. 81

COUNCIL MEETING Dec. 11/72

3. Re: Walkway - Still Creek

Council on October 23, 1972, asked when the Planning Department's report on a walkway for Still Creek will be completed. Some preliminary work has been done. It has been concluded that the walkway is desirable and that more detailed work should be undertaken to determine if it is feasible. To this end, the following aspects are being examined:

1. Existing ownership pattern
2. Existing land use pattern
3. Existing legal rights through existing easements
4. Alternative methods of achieving public access
5. Possible staging of a walkway
6. Review of the water quality

Some work has been done on these topics and it is expected that a report could be submitted to Council by the end of January. If the Department is in a position to advance a meaningful interim report before this date, it will be forwarded accordingly.

This is for the information of Council.
