

4. Re: Lane North of and Parallel to 14th Avenue, East
From 13th Street to the E.P.L. of Lot 20, Block 2,
D.L. 29, Plan 3035

On October 2, 1972, Council received from the Municipal Clerk a Certificate of Sufficiency covering the construction and paving of the subject lane as a local improvement by the petition method.

Following is a cost report which is required by Section 601 of the Municipal Act and which is supplied by the Treasurer:

Length of work	430	feet
Estimated cost of work	\$ 5,000.00	
Actual frontage	554.40	feet
Taxable frontage	554.40	feet
Owner's share of the cost of the work	\$ 554.40	
Estimated lifetime of the work	10	years
Frontage tax levy	5 installments of \$.257	per taxable front foot

The Engineer requests authority to add the paving of the lane to Asphaltic Concrete Supply Contract 1972, Contract #16. The estimated cost of paving the lane is \$750. The balance of the work involving construction of the base will be carried out by Municipal forces as has been customary.

RECOMMENDATIONS:

- THAT the cost report be received; and
- THAT a construction by-law be brought forward; and
- THAT the paving only of the lane be added to Asphaltic Concrete Supply Contract 1972, Contract #16.
