

ITEM 22

MANAGER'S REPORT NO. 72

COUNCIL MEETING Nov. 6/72

22. Re: Operating Engineers "U" Building
Rezoning Reference #55/72
(Item 3, In Camera Report No. 71, October 31, 1972)

Council on October 31, 1972, tabled a report from the Director of Planning concerning the above subject. It was anticipated that a full report, including appropriate recommendations on the proposed amendment to the CD plan, on the reduction of the portion of Lot 4 to be acquired, and on the application to rezone Lot "B" from R4 to P8 to allow development of the requested surface parking lot, would be made available for the consideration of Council on November 6, 1972.

The Planning Department has not yet received the necessary preliminary drawings for the amended auditorium. Consequently, the department is not at this time in a position to present the full report on this application or to request a Public Hearing for the various amendments.

Planning has contacted a representative of the Union and the architect for the project, and is informed that a submission is to be made following a client/architect meeting scheduled for November 7, 1972. It is anticipated that this will make possible the complete report item for the next following meeting of Council (November 15, 1972).

This is for the information of Council.
