

ITEM 21

MANAGER'S REPORT NO. 19

COUNCIL MEETING Mar. 11/74

Re: Letter dated February 26, 1974 from Mr. D. Weber  
Dunhill Management  
145 East Fifteenth Street, North Vancouver  
Containerized Waste Disposal

Appearing on the Agenda for the March 11, 1974 meeting of Council is a letter from Mr. D. Weber regarding containerized waste disposal services for condominium developments.

Following is an excerpt from Item 17, Report No. 13 which Council received on February 18, 1974:

"The Engineer suggests ... that a study be conducted to determine the effects of a policy under which the Municipality would provide garbage pick-up services to strata title developments in much the same manner as such services are now rendered to households. The need for such a study is required because of the considerable amount of strata title development that has and will continue to take place in Burnaby, and also, because any liberalization of garbage disposal services would have a significant impact on manpower, equipment and overall costs.

It is anticipated that the comprehensive study on charges for disposal services to strata title developments, which is referred to in the Engineer's report, will be submitted to Council for consideration within three months."

Council on that date adopted the following recommendations:

"THAT no change be made in the policy at present but that a thorough study of garbage disposal services and related charges to strata title premises be conducted by the Engineer and Treasurer; and

THAT this request be reviewed after the conclusion of and presentation of the study."

RECOMMENDATION:

THAT Mr. Weber be advised that this matter will be considered by Council following completion of a report by staff on approximately May 20, 1974.
