

Re: 1976 MAPPING PROGRAM PREPARATORY WORK
(ITEM 18, SUPPLEMENTARY, REPORT NO. 15, MARCH 8, 1976)

Council, at its meeting of March 8, 1976, received the above-noted report and authorized the expenditure of \$3,375 for painting of ground targets as the first phase in preparation for the 1976 Mapping Program.

Following is a report of the Municipal Engineer, dated March 26, 1976, which requests authorization to expend funds to carry out aerial photography as phase two of the Mapping Program. The Engineer advises that Pacific Survey Corporation is the only firm which can provide satisfactory services to the Municipality in this regard.

RECOMMENDATION:

1. THAT funds in the amount of \$3,500 be authorized so that work can proceed immediately.

TO: MUNICIPAL MANAGER

FROM: MUNICIPAL ENGINEER

SUBJECT: 1976 MAPPING PROGRAM PREPARATORY WORK

Further to our report to Council dated 8 March, 1976, requesting the release of funds to cover the cost of targeting work for aerial photography, we are now ready to proceed with the aerial photography part of the program and we would request that funds be released from the 1976 C.I.P. Budget Code 10-01-066 for the cost of carrying out this work.

Several proposals were received and analyzed and the low bidder was chosen. We would request that the amount of \$3,500 be released from the C.I.P. Budget.

RECOMMENDATION:

THAT the above funds be authorized so that work may proceed immediately.

MUNICIPAL ENGINEER
