

ITEM	8
MANAGER'S REPORT NO.	55
COUNCIL MEETING	Sept. 7/76

Re: LETTER FROM MRS. VIRGINIA STELP THAT APPEARED ON THE AGENDA
FOR THE AUGUST 30, 1976 MEETING OF COUNCIL (ITEM 2(d))
DRIVEWAY ACCESS TO RESIDENTIAL PROPERTY ON MARY AVENUE

On August 30, 1976, Council received a letter from Mrs. Virginia Stelp requesting that a vehicular crossing be constructed on the East side of her property which is located at 6961 Mary Avenue. Mr. Stelp also appeared as a delegation on that occasion for the purpose of presenting his views on this matter.

As noted in the following report from the Municipal Engineer, the crossing has been constructed at the location that has been requested by Mr. and Mrs. Stelp. The Engineering Department made this decision because the driveway existed prior to 1965 when the Zoning By-Law was amended.

This is for the information of Council.

TO: MUNICIPAL MANAGER

31 August, 1976

FROM: MUNICIPAL ENGINEER

SUBJECT: DRIVEWAY ACCESS TO SERVE 6961 MARY AVENUE (STELP)

Mr. Stelp appeared before Council at its meeting of 30 August, 1976, requesting that a curb crossing be provided to the location on his property which he has been using as a parking area since the former carport was enclosed and made part of the house.

On the other side of Mr. Stelp's property there existed sufficient room to gain access to his backyard, but in order for him to do so it would have been necessary to demolish an outside structure in the backyard.

In view of the foregoing, I have directed the contractor to install the curb crossing at the location requested by Mr. Stelp.

This is for the information of Council.

EEO
MUNICIPAL ENGINEER
