MANAGER'S REPORT NO. 11
COUNCIL MEETING Feb. 14/77

Re: MEDICAL HEALTH QUARTERLY REPORT

Following is the report of the Medical Health Officer covering the activities of her Department for the months of October, November and December, 1976.

This is for the information of Council.

QUARTERLY REPORT

M. J. Shelley Municipal Manager

Dear Sir,

I have the pleasure of submitting the Quarterly Report for the Health Department covering the months of October, November and December 1976.

In October, Dr. W. F. Sunderland retired from his position as Medical Health Officer for Burnaby, after twenty-five years of service. He was replaced by Dr. Sarah L. Hemming, who started on October 18, 1976.

October also saw the transfer of the Victorian Order of Nurses into the Health Department. The nineteen nurses (including one Associate Co-ordinator, eleven full-time, four part-time, and three casual relief nurses) are now employed by the Burnaby School Board. Two physio therapists, one licenced practical nurse and one clerk are employed by the Corporation. We are pleased to report that all staff chose to stay on in Burnaby. This resulted in absolutely no change in the service. An orientation program is underway for the staff, and various activities have been initiated to complete the integration. This aspect of the public health program is now called the Home Care Service.

In November we received our first shipment of the Swine Flu Vaccine. Policies for the operation of the programme for immunization for swine flu had been generally delineated by the Federal Government with some modification by the B.C. Provincial Health Department, in that only the bivalent vaccine of A Victoria and A New Jersey (swine flu) was used here, and this province did not proceed with the monovalent A New Jersey (swine flu) for mass immunization of the general adult population. Under these policies the vaccine in use was only available through Public Health departments.

Planning for the programme in the Lower Mainland was done in cooperation with neighbouring health departments in Vancouver, Richmond and the North Shore and the two Provincial Health Units at Simon Fraser and Boundary.

In Burnaby, the vaccine was made available first to those eligible persons in institutions. This included the Burnaby General Hospital Extended Care Unit, George Darby Hospital, all Private Hospitals, Intermediate and Personal Care Homes and Oakalla. We then held clinics at the three senior citizen centers in Burnaby (Bonsor Park, Confederation House and Edmonds House). Public clinics were operated as advertised in the newspapers, at Kensington and Burnaby South High Schools. In total, approximately 2,000 doses of the vaccine were administered.

We were about to expand the program to Include those in essential services when the Provincial Health Department decided to call a halt pending further information from the U.S., where the vaccine in use there may have been linked to serious illness.

We have had no such complications reported in Burnaby.

The vaccine was subsequently made available again but only to those with chronic health problems.

112

As reported in the last Quarterly Report, we still have high enrolment in prenatal classes. It is noteworthy that despite the statistical reports showing a decrease in the birth rate in Burnaby, we continue to have a constant demand for prenatal classes and enrolment has remained the same.

Respectfully submitted,

S. L. Hemming, M.B., D.P.H., F.R.C.P.(c)
MEDICAL HEALTH OFFICER
