Re: CLOSURE OF THE LANE SOUTH OF KITCHENER WEST OF SPERLING

Following is a report from the Municipal Engineer on the proposed closure of a lane.

RECOMMENDATIONS:

1. THAT the lane between Kitchener and Grant Streets be closed to traffic by a barricade to be installed at the location as shown on the attached sketch.
2. THAT all the abutting owners, including the petitioners, be so advised.

November 17, 1977.

TO: MUNICIPAL MANAGER  
FROM: MUNICIPAL ENGINEER  
SUBJECT: CLOSURE OF THE LANE SOUTH OF KITCHENER WEST OF SPERLING.

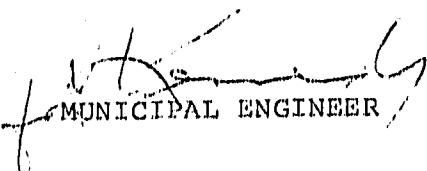

We have attached a copy of a petition received from the residents bordering both sides of the lane between the 6500 and 6600 blocks Kitchener and Grant Streets requesting that the lane be barricaded at the east end. The reason given for this request is that a large number of vehicles are shortcutting through this lane at a high rate of speed, primarily to gain access to a local grocery store. A diagram showing the proposed barricade location has also been attached.

We contacted the Sanitation Department and were informed that closing this lane would force the garbage truck to back down it 1100 feet and out on to Kensington Avenue. Although this is a fairly difficult maneuver for this type of vehicle, this condition already exists in a number of other lanes in the Municipality.

While we have not actually witnessed a vehicle problem in the subject lane, 87% of the residents living along the lane feel strongly enough about the problem to suffer the inconvenience of having it closed. For this reason and the fact that we find no strong reason not to grant them their request, we would support the requested closure.

RECOMMENDATIONS:

1. THAT the lane between Kitchener and Grant Streets be closed to traffic by a barricade to be installed at the location as shown on the attached sketch.
2. THAT the petitioners be sent a copy of this report.
