Council has adopted recommendations which will result in the eventual submission of a Fire Protection and Control Master Plan for Burnaby.

Members of Council will find in their envelopes a publication entitled Urban Guide for Fire Prevention and Control Master Planning.

This document is a step-by-step manual which outlines the procedures for planning and implementing master plans in urban communities. It has been tested in thirteen U.S. communities and reviewed by fifty states. The Technical and Advisory Committees intend to use it as the basis for the development of a plan which will meet the particular requirements which are common to the situation in our own community.
