REPORT

The Planning Department has been requested to reply to a letter from Ardena Jackson regarding the priority status of the proposed Metrotown - Area 11 Community Plan. We would confirm that this community plan study has been given a high staff priority over the past year but would also confirm that matters arising out of Council deliberations requiring varying degrees of staff attention have had a higher priority from time-to-time.

As of this date, preliminary community plan drafts have been prepared. A final draft community plan is intended to be complete by early December. Following final coordinative discussions, a report on this community plan area should be submitted for the consideration of Council in January of the new year.

This is for the information of Council.
