MANAGER'S REPORT NO.	51
COUNCIL MEETING	1979 07 30

Re: WALKWAY FROM LAMBETH DRIVE TO BURRIS STREET  
D.L. 86

Following is a report from the Director of Planning regarding the proposed construction of a walkway.

If authorized to proceed, the work would be carried out by the Parks and Recreation Department.

RECOMMENDATION:

1. THAT the recommendation of the Director of Planning be adopted.

\* \* \* \* \*

1979 July 23

TO: MUNICIPAL MANAGER  
FROM: DIRECTOR OF PLANNING  
RE: D.L. 86 - WALKWAY FROM LAMBETH DRIVE TO BURRIS STREET

RECOMMENDATION

1. THAT a rustic type walkway, using limestone chip and wooden log steps, be constructed during 1979 on the Braemar Avenue allowance linking Lambeth Drive and Burris Street, at a cost of \$14,000.

REPORT

When D.L. 86 Stage (IV) was subdivided by the corporation, a section of the Braemar Avenue road allowance was retained with the intent of constructing a walkway to link Lambeth Drive with Burris Street.

It is considered that, to run through this strip which contains attractive trees, a rustic type of walkway made with limestone chips and wooden log steps is more appropriate to the environment than the usual concrete walkway.

Citizen requests from property owners in the immediate area have been made for the early completion of this walkway.

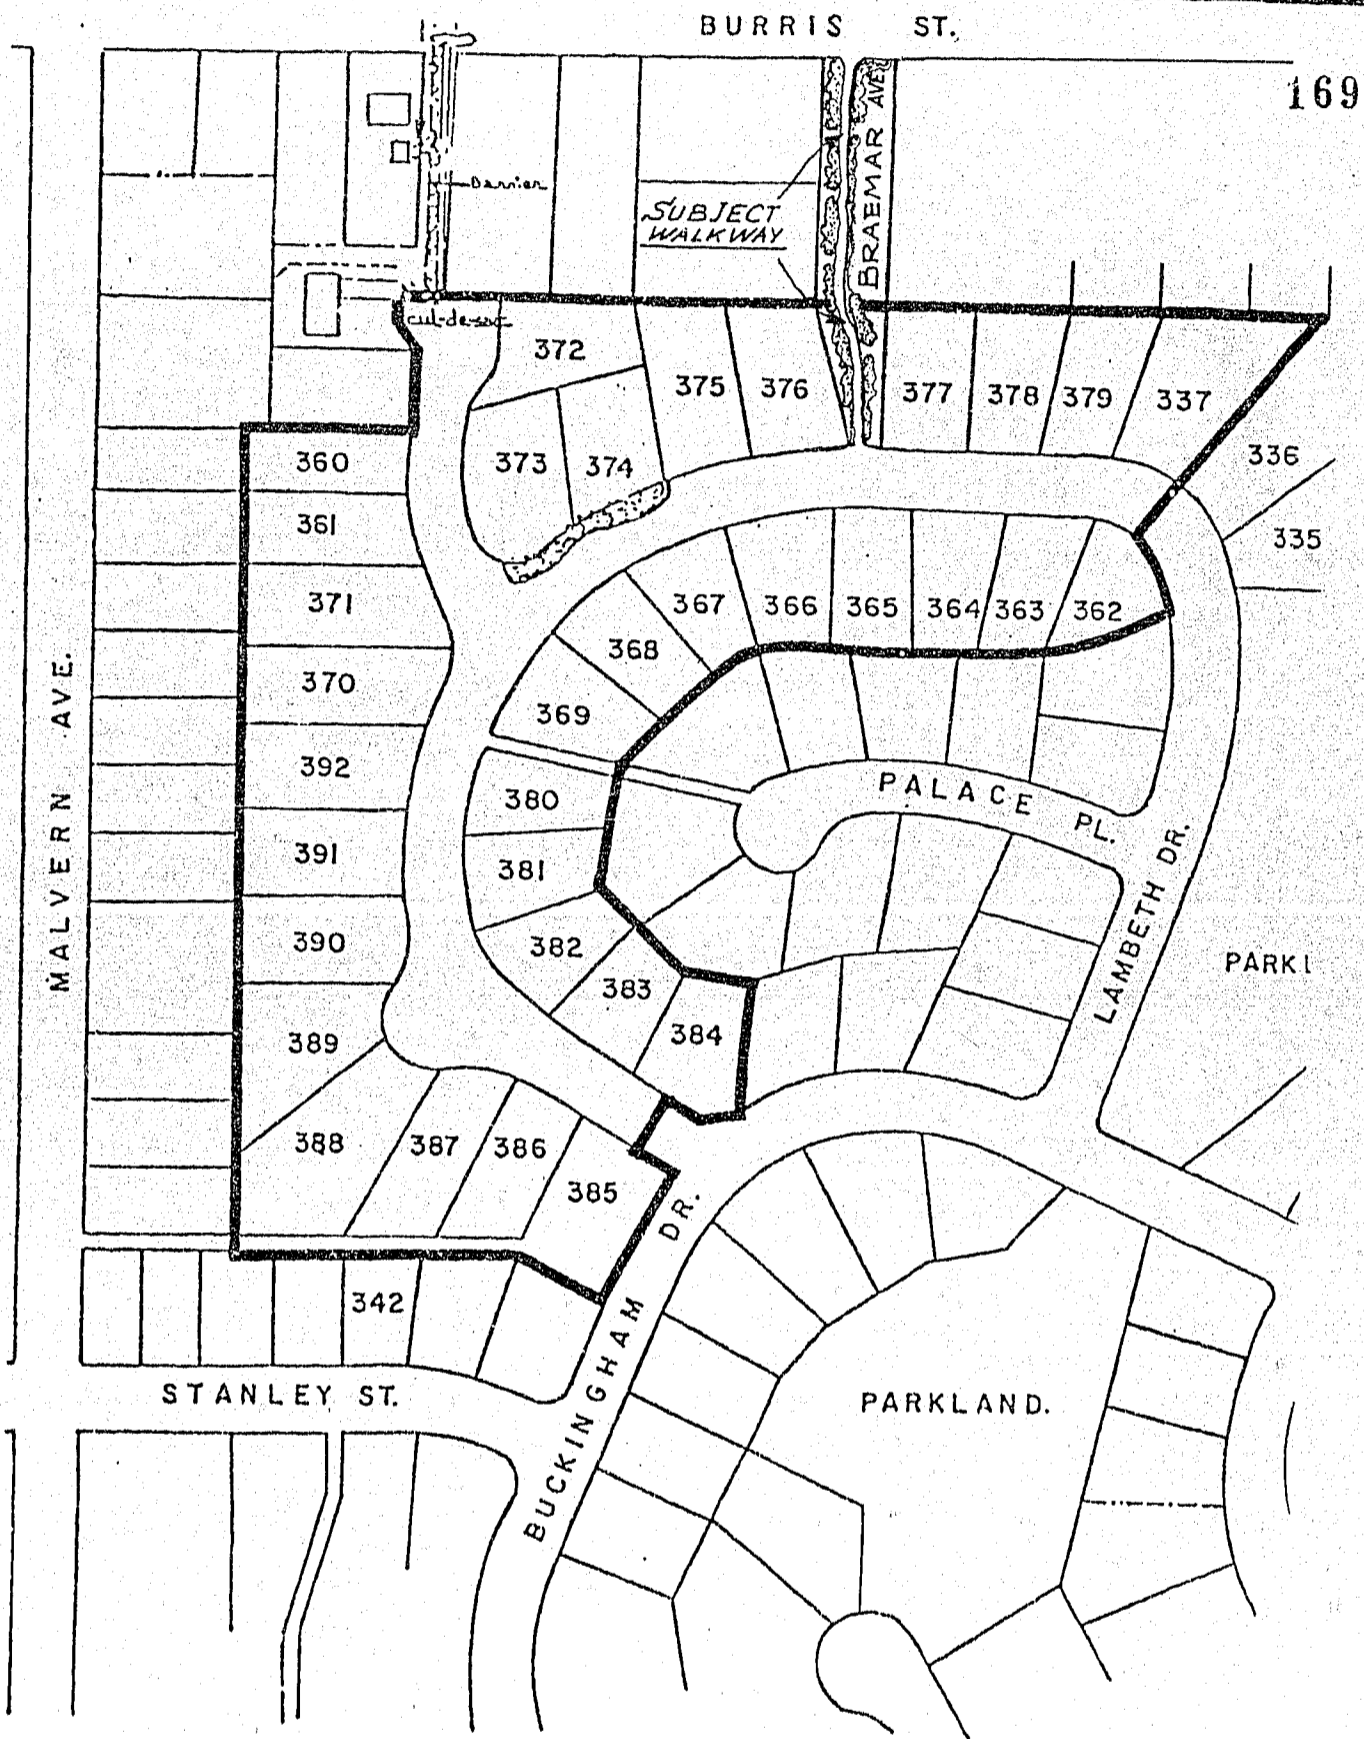

An allocation of \$14,000 has been included in the Land Assembly and Development section of the 1979-1984 C.I.P. for the completion of this work. However, the modification in design as noted above will allow the construction to be done at a cost of approximately \$10,000.
