RE: COMMERCIAL BUS SHELTER PROGRAM

Following is a report from the Municipal Engineer regarding the municipality's commercial bus shelter program.

RECOMMENDATION:

1. THAT the recommendation of the Municipal Engineer be adopted.

\* \* \* \* \*

TO: MUNICIPAL MANAGER 80 01 17  
 FROM: MUNICIPAL ENGINEER  
 SUBJECT: COMMERCIAL BUS SHELTER PROGRAM

RECOMMENDATION:

1. THAT Council approve westbound Canada Way at Willingdon and eastbound Hastings at Gilmore as alternative commercial bus shelter locations to replace two previously approved locations.

REPORT

Of the originally approved 40 commercial bus shelter locations, see attached list, 37 are currently installed. One, westbound Kingsway at Willingdon, has now received final approval for a minor encroachment from the adjacent property owner and will be installed shortly. The two other shelter locations, numbers 39 and 40 on the attached list, were removed from the program as, upon closer inspection, it was felt that they would have been detrimental to the adjacent small businesses. As alternatives to these locations we are recommending the installation of a commercial bus shelter at the following locations:

1. Northeast corner of Canada Way at Willingdon Avenue:

Originally considered a priority location but rejected as it was felt there was insufficient boulevard width. Subsequent investigation located a property line marker which indicates that the property line is at least 3 metres back of the face of the curb, which is the minimum required before a shelter will be installed.

COUNCIL MEETING	1980 01 28

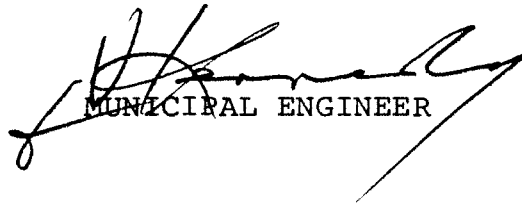

2. Southeast corner of Hastings Street at Gilmore Avenue:

126

Originally considered a priority location but the existence of a building overhang precluded the need for a shelter. After the commercial shelter program had been approved the building was renovated and the overhang eliminated.

Both of these locations will not require any site preparation, except sign post relocation, prior to the installation of the bus shelter. Also, at both of these locations we have received requests for the installation of bus shelters including the tenants of the adjacent premises.

These two locations will complete the initial commercial bus shelter program and hopefully within two months we, in conjunction with the Planning Department, will have prepared a report on the installation of both non-commercial bus shelters and a second phase of commercial bus shelters.
