

TO: MUNICIPAL MANAGER 1991 OCTOBER 16

FROM: DIRECTOR ENGINEERING FILE: 41-05-02

SUBJECT: BARNET BEACH SEWER SYSTEM - ENGINEERING AGREEMENT

PURPOSE: To obtain approval for engineering fees on the Barnet Beach Sewer System.

---

RECOMMENDATION:

1. THAT engineering fees for the Barnet Beach Sewer System be approved in the amount of \$132,000.

REPORT

The Barnet Beach sewer project to provide sanitary sewer services for the Barnet Beach park and the new Velodrome site has now been substantially completed. The initial budget provision for this project as identified in the Capital Budget was \$1,200,000. The projected final cost is \$910,000, well within the initial budget estimates.

The engineering consulting firm of Dayton & Knight Ltd. had been retained to provide engineering design services and also construction supervision services on this project. The total of these combined services is \$132,000. Under current policy, Council approval is required when total expenditures for a project assignment exceeds \$100,000. Due to an oversight, staff neglected to obtain Council approval of the combined fees awarded to the engineering consultant. Staff apologize for this error.

Although the work is complete, it is now necessary that we seek Council endorsement of the engineering fees. Funds have previously been allocated within existing work orders.

Work on this sewer project proceeded smoothly and within the project funding amounts approved by Council.
