# RECREATION SERVICES PRICING GUIDELINE

2/08/10 MANAGER'S REPORT NO. 6 COUNCIL MEETING TEM

The pricing policy should:

- to recreation service a) Allow a reasonable level of accessibility
- b) Produce revenues that keep pace with rising costs
- c) Price all services at fair value
- d) Provide a rational base for the application of subsidies

slow base which would samore stable This would achieve an equitable pricing structure growth of the net operating budget and provide a continuing recreation opportunities.

#### Market Value: N

The value of any given service is ultimately decided by public opinion which strongly determines the marketable price of the service. Market value is the price the public is willing to pay for a given service. It is usually based on current rates for comparable services in the public is usually based on current rates for comparable services in the public the private sector. of the service.

than the sector, if the service costs more the the service is discontinued. private willing to pay, the

is either discontinued or se the community through be made available to h a service is tax base because service should be olic sector, such a se from the general tax bas sides that the service decides pub I i c subsidized residents. the Counc i I

against all recreation oposed that market price be levied against all recreat In so doing, all consumers will share fairly in the cost the total recreation service not just a limited segment of proposed that market consumers. operating services.

## Method of Determining Subsidy: e,

a subsidy is required it will be based on four factors:

- of the service a) Market value
- Cost of providing the service

- costs
- administration costs Direct leadership costs Activity supply costs A portion of the full facility operation A portion of the full direct administrati
- The benefit of the activity to the general public ີວ
- d) The practicability of collecting fees

The capital cost of facility construction is not included. It is assumed that the Corporation will provide only those facilities which it considers appropriate for the benefit of its residents. A break with normal practice in including capital costs in the price of the service would provide a more sophisticated in-house book value for that service but would probably be of little practical application in as much as our experience with the public's willingness to pay would lead us to believe that in no case would prices be able to recapture the full cost, thus accounting a complicated only considered þe could that with ending

## to the General Public: 4

brime factor to be considered in determining degree of subsidy is that benefit to the general public. Services will be categorized according their degree of general public benefit. These categories will then be to determine the potential for subsidization. used to o **L** 9

The general category headings are as follows:

# General Public Consumption Service:

services are free of charge because they provide benefit to all is and are generally viewed as being of high value to the y of the citizens. Charging a fee for some of these services is of feasible because of the control problems related to fee for example, parks and beaches. citizens and majority of the also not feas collection, no t

## Preferred Public Consumption Service: Q

(Possible subsidization)

participant and a recognized benefit or value to the general public. These services will be offered at a fair market price. This market price may or may not meet the cost. A degree of subsidization would, therefore, be considered which could vary greatly with the cost of the service and the market value. For example, the market price for minor hockey ice time and sport field use will probably require substantial substantial direct benefit to Ø category includes services which provide subsidies

# Personal Consumption Services

(Full cost)

activities that are viewed ipant, therefore, there is This category of services includes activity providing a benefit to only the participant, dlrect benefit to the general public.

These services and specialized ics for youth, price of these services will reflect market value and will recover east the full costs as outlined in 3 (b) above. These services include most adult courses and the more advanced and specialized gymnastics advanced fitness, adult 6.9. least the full activities, photography The
