

ITEM	10
MANAGER'S REPORT NO.	20
COUNCIL MEETING	02/03/22

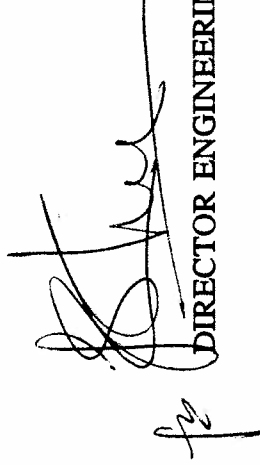

Work Orders: 60-30-082, Sanitary Sewer Infiltration
60-21-098, Water Distribution System Study
1992 March 16 - Page 2

150

The G. V. W.D. have established a technical Committee which is currently preparing a study on the water supply, quality and conservation issues at a regional level. Burnaby is represented on this committee.

In concert with the regional study, Burnaby has identified the need to update the original 1970 study and to prepare a 10 year upgrading plan to meet present and future needs. The plan update will include detailed analysis of the municipal distribution system with respect to current population and projected growth to assess the system capacities and demands, and to evaluate improvement alternatives. Estimated cost of the study is \$50,000, funds for which are included in the 1991-1995 Capital Budget.

These expenditures are in conformance with the 1992 Draft Provisional Capital Budget.
