

60-30-083 Engineering Services - Upgrade Sanitary Sewers in the Central Valley Area.

Charge: 1992 Provisional Capital Budget
Code 30 - Sanitary Extensions

108

\$60,000

Additional Information: Soil conditions in the Central Valley Area are extremely sensitive and highly compressible and, as a consequence, the existing sanitary sewer system is subject to severe settlement problems. A comprehensive study was completed in 1991 has identified a program of rehabilitation and improvements which are scheduled for construction this year. The 1992 Provisional Budget includes funding allocation of \$300,000 for the proposed improvements. This work order pertains to consultant services required for the preparation of detail design drawings at an estimated cost of \$60,000.

Funding for expenditures, as described in the respective work orders requested above, are in accordance with the draft 1992 Provisional Capital Budget. However, approval is required prior to final adoption of the 1992-1996 Capital Budget in order to maximize the benefits of the optimum construction season
