

TO: MUNICIPAL MANAGER 1992 September 01

FROM: DIRECTOR FINANCE

SUBJECT: CONTRACT NO. 9217 - 12TH AVENUE CREEK CULVERT  
CONSTRUCTION AND CHANNEL RELOCATION

PURPOSE: To obtain approval to award a contract for the construction of  
culverts and channel relocation at the 12th Avenue Creek.

=====

RECOMMENDATION:

1. THAT a contract be awarded to the lowest bidder, Hussey Contracting Ltd., for the construction of culverts and channel relocation at the 12th Avenue Creek for a total cost of \$129,766.39 with final payment based on actual quantities and unit prices tendered.

REPORT

Eight tenders for this work were received by the closing time of 3:00 p.m. Monday, 1992 August 31 and were opened by municipal staff in the presence of representatives of the firms bidding. A tabulation of the tenders received is attached (Attachment A).

The work of this contract involves the supply of all labour, materials, tools, plant and equipment required for the construction of inlet and outlet culverts and the relocation of a 150 metre long section of the 12th Avenue Creek below Marine Drive.

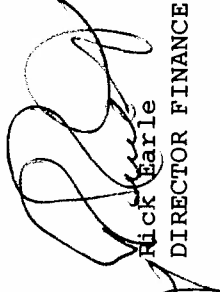

The project was identified in the Big Bend Drainage Improvement Program and its implementation is considered one of the highest priorities to correct longstanding flooding problems in the area.

The Director Engineering's estimate for this work is \$144,000.

The recommended bidder, Hussey Contracting Ltd., has recently completed the construction of the Sperling Avenue and Royal Oak watermains under Contracts No. 9201 and No. 9122 respectively, and of the drainage improvements under Contract No. 9101. Based on their past performance, the Director Engineering is completely satisfied that they have the necessary experience and resources to complete the work of this contract.

This work is being advanced from the 1993 portion of the Capital Budget under Storm Extensions. Funds are available under existing work order No. 60-32-090. This expenditure will be accommodated within the 1992 Capital Budget totals by reallocation of savings realized from other Engineering projects.

The Director Engineering and our consultant, Kerr Wood Leidal Associates Ltd., concur with the above recommendation.
