MANAGER'S REPORT NO.	43
COUNCIL MEETING	93/06/28

TO: CITY MANAGER

FROM: CITY SOLICITOR

RE: FEDERAL LEGISLATION TO REGULATE TELECOMMUNICATIONS

PURPOSE: To respond to Council's request for information.

---

DATE: JUNE 18, 1993

Recommendation:

1. This report is for the information of Council.

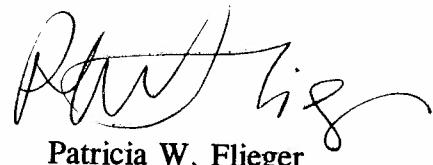

REPORT

Council requested a report from staff on a new federal statute, the Telecommunications Act, which has passed all readings in the House of Commons and is being considered by the Senate.

The U.B.C.M. is concerned that municipalities were not consulted about a section of the Act that gives the C.R.T.C. powers to allow a telecommunications company to construct a transmission line even though the municipality in which the line is located has not consented to the construction.

Comparison of the new legislation with existing legislation (Section 329 of the Railway Act) reveals that the C.R.T.C. enjoys that power now and the section highlighted by the U.B.C.M. does not appear to be a significant change.

Section 48(4) of the Telecommunications Act and section 329 of the Railway Act are attached for reference. Note that reference to a telephone company in the Railway Act has been interpreted to include a cablevision company.

Clause 48

## Application by carrier

(4) Where a Canadian carrier or distribution undertaking cannot, on terms acceptable to it, obtain the consent of the municipality or other public authority to construct a transmission line, the carrier or distribution undertaking may apply to the Commission for permission to construct it and the Commission may, having due regard to the use and enjoyment of the highway or other public place by others, grant the permission subject to any conditions that the Commission determines.

## Access by others

(5) Where a person who provides services to the public cannot, on terms acceptable to that person, gain access to the supporting structure of a transmission line constructed on a highway or other public place, that person may apply to the Commission for a right of access to the supporting structure for the purpose of providing such services and the Commission may grant the permission subject to any conditions that the Commission determines."
