Street and Lane Rehabilitation \$1,675,000

Additional Information: This work order provides funding for the annual pavement rehabilitation program. Work consists essentially of removing deteriorated pavement surface and replacement with a new asphaltic overlay. It also includes reconstruction of roads severely cracked due to increased traffic loading and deteriorating road base strength. The rehabilitation program is an integral component of our infrastructure renewal strategy that protects the City's significant investment in the road system by extending the useful life of pavement. Sufficient General Revenue funds are available and these expenditures are included in the Street and Lane Rehabilitation component of the 1996 Capital Program.
