DATE: 2000 MAY 10

FROM: DIRECTOR ENGINEERING

FILE: 10-01-12

SUBJECT: WORK ORDER:

60-30-103 Westridge Combined area Sewer Separation

PURPOSE: To obtain approval of Work Order 60-30-103

RECOMMENDATION:

1. THAT the above work order as more specifically referred to in this report, be approved.

REPORT

60-30-103 Engineering Services- Westridge Combined Area Sewer Separation

Charge: 2000 Annual Capital Budget
Sanitary Sewer Utility \$90,000

Additional Information: Sewers in the general north Burnaby area, including the Westridge Combined Sewerage Area, convey both sanitary and stormwater flows in a single pipe. During wet weather combined sewage overflows can occur. Staff have developed a phased program to replace existing combined sewers with separate sanitary and storm sewers. Primary benefits of the program would be the protection of public health and the environment. Consultancy services are required to prepare detailed engineering designs and provide contract administration related to the Westridge Combined Area Sewer Separation. Total cost of engineering services is estimated at \$90,000. Sufficient General Revenue funds are available and these expenditures are included in the Sanitary Sewer Utility component of the 2000 - 2004 Annual Capital Program.
