
TO: CITY MANAGER **DATE:** 2007 November 27

FROM: DIRECTOR ENGINEERING

SUBJECT: 2008 MRN AND WATERMAIN PAVEMENT REHABILITATION

PURPOSE: To seek Council's approval for engineering design and construction inspection services related to the 2008 and 2009 MRN pavement and watermain rehabilitation program.

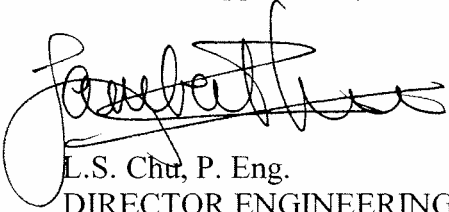

RECOMMENDATION:

1. **THAT** Council approve the retention of ISL Engineering and Land Services Ltd for engineering services related to the 2008 and 2009 MRN pavement and watermain rehabilitation program on the Major Roads Network within the City at an estimated cost of \$350,000 (inclusive of 6% GST).

REPORT

The City has invited three qualified consultants to submit proposal for engineering services related to the 2008 and 2009 Major Roads Network (MRN) road rehabilitation and associated watermains renewal program. The scope of work includes design and construction inspection services for the 2008 program and design only for the 2009 program. The proposals were reviewed by staff with respect to company experience, work methodology and cost and it was concluded that ISL Engineering and Land Services Ltd. made the best overall submission. The total engineering cost of this assignment is estimated at \$350,000.

ISL has successfully completed other MRN rehabilitation programs for the City. The engineering cost submitted by ISL is competitive and consistent with other engineering fees for similar type projects within the City. Therefore, it is recommended that this MRN design and construction inspection assignment be awarded to ISL. The Purchasing Manager concurs with the recommendation. Funding for this project is available within existing Internal Orders previously approved by Council.
